

# EYELID ENHANCEMENT KIT

## BACKGROUND OF THE INVENTION

### 1. Field of the Invention

The present invention relates to an eyelid enhancement kit, and more particularly to the eyelid enhancement kit containing therein a pair of eyelid masks and an eyebrow brush such that the user is able to use the enhancement kit to nurse the eyelids at any time, any place.

### 2. Description of Related Art

A woman will try her best in order to accomplish the objective, different cosmetics are applied to the skin in different areas. However, it seems that there are no cosmetics aiming to nurse the skin around the eye. Three different aspects of face treatment are: whitening, moisturizing and energizing the skin. The most direct and effective manner to accomplish the three objectives is the facial mask. The users apply the facial mask on the face nursing most areas on the face. However, because the eyelid and the skin around the eye are concave relative to the adjacent skin, the facial mask has only little effect on the eyelid and the skin around the eye.

To overcome the shortcomings, the present invention tends to provide an improved eyelid enhancement kit to mitigate the aforementioned problems.

## SUMMARY OF THE INVENTION

The primary objective of the present invention is to provide an improved eyelid enhancement kit with a pair of eyelid masks received therein and an eyebrow brush so that the user is able to use the eyelid masks to nourish the skin around the eye and the eyelids.

Another objective of the present invention is that the eyebrow brush has a

1 rubber cap to fulfill requirement of massaging the eyelid and the skin around the eye.

2 Other objects, advantages and novel features of the invention will become more  
3 apparent from the following detailed description when taken in conjunction with the  
4 accompanying drawings.

#### 5 BRIEF DESCRIPTION OF THE DRAWINGS

6 Fig. 1 is a schematic view showing the eyelid curing kit of the present invention;  
7 and

8 Fig. 2 is an exploded perspective view showing the elements of the eyelid  
9 curing kit in Fig. 1.

#### 10 DETAILED DESCRIPTION OF THE PREFERRED EMBODIMENT

11 With reference to Fig. 1, the eyelid enhancement kit in accordance with the  
12 present invention has a package (10) divided into a first compartment (11) and a second  
13 compartment (12), wherein a first tray (20) is received in the first compartment (11) and  
14 a second tray (30) is received in the second compartment (12).

15 With reference to Fig. 2, it is noted that the first tray (20) has a first recess (21)  
16 and a second recess (22) defined in a top face of the first tray (20). A first cutout (211) is  
17 defined in a periphery defining the first recess (21) to communicate with the first recess  
18 (21). A second cutout (221) is defined in a periphery defining the second recess (22) to  
19 communicate with the second recess (22). A cover (40) having a first protruding area (41)  
20 extending downward from a bottom face of the cover (40) and having a shape and  
21 configuration corresponding to the combination of the first recess (21) and the first  
22 cutout (211) so that the first protruding area (41) is able to be received in the  
23 combination of the first recess (21) and the first cutout (211) and a second protruding  
24 area (42) extending downward from the bottom face of the cover (40) and having a

1 shape and configuration corresponding to the combination of the second recess (22) and  
2 the second cutout (221) so that the second protruding area (42) is able to be received in  
3 the combination of the second recess (22) and the second cutout (221). That is, when the  
4 cover (40) is on top of the first tray (20), the first and second protruding areas (41,42)  
5 being received in the respective combination of the first recess and cutout (21,211) and  
6 the combination of the second recess and cutouts (22,221) secures the engagement  
7 between the first tray (20) and the cover (40). A first eyelid mask (23) having ingredients  
8 of herbal medicine, negative nano-ions and infrared energy is able to be received in the  
9 first recess (21). A second eyelid mask (24) having the same ingredients as those of the  
10 first eyelid mask (23) is able to be received in the second recess (22). After the first and  
11 second eyelid masks (23,24) are received in the first and second recesses (21,22), the  
12 first cutout (211) and the second cutouts (221) are designed to facilitate accessing to the  
13 first and the second eyelid masks (23,24) respectively.

14         The second tray (30) has a third recess (31) defined in a top face of the first tray  
15 (30).

16         An eyelid brush (32) has multiple bristles (321) formed on a side of the eyelid  
17 brush (32), teeth (322) formed on the eyelid brush (32) opposite to the bristles (321), and  
18 a rubber cap (323). The eyelid brush (32) has a configuration and shape corresponding  
19 to the third recess (31) of the second tray (30) so that the eyelid brush (32) is able to be  
20 received in the third recess (31).

21         When the eyelid enhancement kit of the present invention is used, the user is  
22 able to use the first and second eyelid masks (23,24) to cover the eyelids and the skin  
23 surrounding the eyes and applies the rubber cap (323) to rub or massage the vital points  
24 adjacent to the eyebrows. Also, the bristles (321) and the teeth (322) are able to be used

to smoothen the eyebrows.

After the first and second eyelid masks (23,24) are applied to cover the eyelids and the skin around the eyes, the herbal medicine, and the infrared energy inside the masks (23,24) are able to nourish the eyelids and the skin around the eyes.

It is to be understood, however, that even though numerous characteristics and advantages of the present invention have been set forth in the foregoing description, together with details of the structure and function of the invention, the disclosure is illustrative only, and changes may be made in detail, especially in matters of shape, size, and arrangement of parts within the principles of the invention to the full extent indicated by the broad general meaning of the terms in which the appended claims are expressed.
